Summary

Senior mobile engineer with 8+ years of experience building native and cross-platform apps used by millions. Works across the stack — Swift, Kotlin, Flutter on the frontend, AWS, GCP, and Firebase on the backend. Has shipped in fintech (Swedbank, Walley), e-commerce (IKEA), proptech (Hemnet), sports tech (Spiideo), and media (HYPH). Happy to lead when needed, and genuinely enjoys mentoring and working on teams where people learn from each other.

Work Experience

HYPH — Senior Mobile Engineer (2023 – Present)

Music creation app where users create, remix, and share songs.

- Full-stack mobile development across Flutter, native iOS, and native Android
- Step into AWS backend work when needed to support the music creation pipeline
- Bridge Flutter and native platform layers for audio and media features
- Set up and maintain the CI/CD pipeline with GitHub Actions

Strafe — Mobile Engineer, Consultant (2023)

Companion app for competitive gaming and esports coverage.

- Built native iOS and Android features for live match tracking and tournament coverage

OhCleo — Mobile Engineer, Consultant (2023)

Platform for user-created spoken novels.

- Brought in to diagnose and fix severe UI jitter and performance issues in the Flutter app
- Mentored junior developers on Flutter best practices and sustainable architecture going forward

Hemnet — Mobile Engineer, Consultant (2022–2023)

Sweden's largest real estate platform.

- Worked on the native iOS app — large codebase, millions of users

Spiideo — Mobile Engineer, Consultant (2022)

AI-powered sports video platform used by professional athletes and teams.

- Built native iOS features for camera control and video review
- Integrated with proprietary AI camera hardware

Walley — Mobile Engineer, Consultant (2021)

Consumer financing app.

- Built and maintained features across native iOS and Android in a regulated fintech environment
- Worked on CI/CD using Azure DevOps

IKEA — Mobile Engineer / Interim Team Lead (2020–2021)

IKEA's flagship store app — e-commerce and in-store companion.

- Stepped in as interim team lead while continuing to ship native iOS features
- Split time between hands-on development and leading the mobile team
- Migrated CI/CD from Jenkins to GitHub Actions

Playtech — Mobile Engineer / Team Lead (2018–2020)

Digital sportsbook and betting platform.

- Led a mobile team building native iOS and Android betting apps
- Owned the release cycle in a heavily regulated igaming environment

Swedbank — Mobile Engineer (2017–2018)

One of Sweden's largest banks.

- Worked on the native iOS banking app in Objective-C

Wellbefy — Mobile Engineer (2017)

Corporate wellness platform.

- Built native iOS (Swift) and Android apps from early stage — first professional mobile role
